Starling

It's worth noting

In scenarios that are greater than one calendar month (60 days and 90 days), it is assumed that all interest and other charges are repaid by the borrower in full at the time they are charged. These are not capitalised and therefore, do not increase the interest incurred in a subsequent month.

No slider for amount input

While there are no issues with the use of the text field, a slider provides a more frictionless experience especially when users play around with the amount.

Amount covered by thumb

sensitivity of the slider, users are unable

In addition to struggling with the

to see the amount as it's below the

slider where it gets covered by the

user's thumb.

Barclays Bank Account Executive Overdraft Barclays Bank Account Personal Over... Barclays Bank Account Premier Card Over... Barclays Bank Account with Packs

under a drop-down

It's more tricky for users to be able to compare the different account types as they have to tap the drop-down menu at the top which then triggers the iOS drop-down picker at the bottom and select the account everytime they'd like to see costs associated costs with that account type.
